

## Technical Data Sheet

### Rabbit Anti- Human 2C6 scFv Monoclonal Antibody

Product Information	
Product No.	202422
Concentration	2.0 mg/mL
Size	100 µg
Antibody Types	Monoclonal
Antibody Format	Whole IgG
Clone	1F5
Immunogen	scFv region of a CD20-specific Human mAb clone 2C6
Host Species	Rabbit
Reactivity	Human
Storage Buffer	PBS, pH 7.4
Storage conditions	-20°C

#### Description

The rabbit monoclonal antibody 1F5 specifically binds to the scFv region of a CD20-specific human monoclonal antibody (mAb, clone 2C6). CD20 (cluster of differentiate 20) is a protein that is expressed on the surface of B cells, starting at the pre-B cell stage and also on mature B cells in the bone marrow and in the periphery. CD20 is not expressed on hematopoietic stem cells, pro-B cells, or normal plasma cells. The scFv region of 2C6 has been used to develop CD20-specific chimeric antigen receptor (CAR) T cells utilized in clinical trials.

**Flow cytometric analysis of anti-CD20 CAR expression on human cell line Jurkat cells.** Jurkat cells were transduced with lentivirus encoding anti-CD20 CAR and cultured.  $2 \times 10^5$  cells were stained for the expression of anti-CD20 CAR with Rabbit Anti-Human 2C6 scFv Monoclonal Antibody (Product No. 202422, right panel). Secondary staining was carried out with AffiniPure F(ab')<sub>2</sub> Fragment Goat anti-Rabbit IgG(H+L), Alexa Fluor 647 (Product No. 700002). Non-transduced Jurkat cells were used as a control for gating of CAR expression (left panel).

#### Preparation & Storage

- Store at -20°C in small aliquot for long term storage. Avoid freeze/thaw cycle of the reagent
- Shipped at 2-8°C. Store at 2-8°C for short term (1 month).
- The monoclonal antibody was purified by Protein A.

#### Application Notes

Application

Flow cytometry

Routinely Tested

#### Intellectual Product Notices
